

MongoDB Basic Commands Cheat Sheet

Start MongoDB

Open Mongo Shell

```
mongosh
```

Database Commands

Show All Databases

```
show dbs
```

Create / Switch Database

```
use schoolDB
```

Show Current Database

```
db
```

Delete Current Database

```
db.dropDatabase()
```

Collection Commands

Show Collections

```
show collections
```

Create Collection

```
db.createCollection("students")
```

Delete Collection

```
db.students.drop()
```

Insert Commands

Insert One Document

```
db.students.insertOne({ name: "Rahul", age: 21, city: "Jaipur", marks: 90 })
```

Insert Multiple Documents

```
db.students.insertMany([{ name: "Rahul", age: 21 }, { name: "Aman", age: 22 }])
```

Find Commands

Find All Documents

```
db.students.find()
```

Pretty Output

```
db.students.find().pretty()
```

Find One Document

```
db.students.findOne({ name: "Rahul" })
```

Find with Condition

```
db.students.find({ city: "Jaipur" })
```

Comparison Operators

Greater Than

```
db.students.find({ marks: { $gt: 85 } })
```

Less Than

```
db.students.find({ age: { $lt: 23 } })
```

Greater Than Equal

```
db.students.find({ marks: { $gte: 90 } })
```

Less Than Equal

```
db.students.find({ age: { $lte: 22 } })
```

Not Equal

```
db.students.find({ city: { $ne: "Delhi" } })
```

Match from Array

```
db.students.find({ age: { $in: [20,21,22] } })
```

Logical Operators

OR Condition

```
db.students.find({ $or: [{ city: "Delhi" }, { city: "Mumbai" }] })
```

AND Condition

```
db.students.find({ $and: [{ city: "Jaipur" }, { marks: { $gt: 85 } }] })
```

Update Commands

Update One Document

```
db.students.updateOne({ name: "Rahul" }, { $set: { city: "Udaipur" } })
```

Update Many Documents

```
db.students.updateMany({ city: "Jaipur" }, { $set: { active: true } })
```

Increment Value

```
db.students.updateOne({ name: "Rahul" }, { $inc: { marks: 5 } })
```

Delete Commands

Delete One Document

```
db.students.deleteOne({ name: "Rahul" })
```

Delete Many Documents

```
db.students.deleteMany({ city: "Delhi" })
```

Sorting Commands

Ascending Sort

```
db.students.find().sort({ marks: 1 })
```

Descending Sort

```
db.students.find().sort({ marks: -1 })
```

Limit & Skip

Limit Documents

```
db.students.find().limit(5)
```

Skip Documents

```
db.students.find().skip(5)
```

Count Commands

Count All Documents

```
db.students.countDocuments()
```

Count with Filter

```
db.students.countDocuments({ city: "Jaipur" })
```

Distinct Values

Distinct Cities

```
db.students.distinct("city")
```

Regex Search

Regex Search

```
db.students.find({ name: /ra/i })
```
